RICH WOMEN HELP TENEMENT BABIES

**Mothers, as Well as Poorly-Fed
Little Ones, to Be Cared for**

RICH society women of the Back Bay banded together in the Women's Municipal League yesterday and began the work of caring for the poor little

"The work of the league is progressing unusually well," is the statement of Mrs. Edward H. Bradford of No. 229 Beacon street, wife of the prominent surgeon, and chairman of the press committee of the league.

The very newest branch of the work is the social service for infants which the sanitation department, of which Mrs. Richards Bradley is chairman, will carry on. The idea is to take all the undernourished babies that can be found in the poor districts and see that they get the proper care and treatment for a year.

Dr. Thomas Morgan Rotch has granted

"Still another nurse will go from house to house. Her duty will be to give talk

"Another feature of this branch of the work is the work with the mothers. We are to co-operate with the lying-in hospitals and will send many poor mothers there to get proper food and care so that the babies may be strong and healthy when they come

"Those mothers who can afford to pay a certain per cent will be allowed to do so. Those who cannot will be treated free."

Mrs. Francis Lee Higginson and Mr. W. P. Councilman are among others prominent in the work.

HUNDREDS CHASE

ACCUSED ROBBER

After a fifteen-minute sprint through South End streets last night Patrolman Chick of East Dedham street station caught Darius Robida of New Bedford and arrested him on a charge of picking the pocket of Fred Hall of \$13. Hundreds of

Fred Hill, who lives at No. 450 Shawmut avenue, was standing at the corner of the avenue and Dover street at six o'clock when he felt a tug at his money pocket. His roll was gone. Hill made a dive after a youth standing near, who fled.

Patrolman Chick took up the chase which led through Dover, Lehigh, Rose streets, Harrison avenue, back to Dover and Compton streets and to Shawmut avenue again, where the fugitive was caught.

Woman is Found Dead.
Virginia Woodard, a colored woman sixty years old, was found dead in bed from natural causes at No. 50 Middlesex street, South End, yesterday afternoon.

BOY FELL TO DEATH THROUGH SKYLIGHT

Five-Year-Old Nathan Glick
Killed While at Play in
West End.

NATHAN GLICK, five years old, who lived with his parents at No. 6 Nassau street, West End, was killed by a fall from the roof-top of a neighboring 3-story house while at play last evening. The boy fractured his skull and was rushed to the Relief Hospital, but died half an hour after his arrival.

The child had climbed out on the roof of his own house and thence onto the roof of No. 45 Minor street, at the rear. He stepped through an open skylight and fell through the building down to the first floor.

SLIGO CLUB'S PARTY.

Unique Baskets Shown at Exhibition in Investigator Hall.

The Mingo Ladies' "Wild Rose of Lough Gill" Club held a basket party in Investigator Hall, at which over 500 people were present. Among them were representatives from the other county clubs and Irish societies of Boston.

There were 200 baskets on exhibition. The baskets when arranged were a pretty sight and did full justice to the ancient art and handiwork of Ireland. The judges awarded first prize to Miss Minan, whose

WOMAN 102 TELLS HOW TO BE HAPPY

Mrs. Christina Bridgett Receives Numerous Callers on Her Birthday.

Mrs. Christina Taylor Bridgett, of No. 26 Union street, Dorchester, was 102 years old yesterday. She celebrated the day by receiving over sixty callers and handling a pile of letters. "I am big, but I couldn't open all letters," she said. According to Mrs. Bridgett this is the way to live to be 102.

Do not worry.
The more others as you would wish to do to you.
Attend first to your home and children and never mind if you do not attend outside social affairs.
First of fresh air.
Take plenty of exercise.
Be good and you'll be happy.

Mrs. Bridgett is the widow of Captain William Bridgett, for many years agent of the Seaman's Bethel. Born of Grand River, before Edward island, March 15, 1807, she married at the age of thirty-one and came with her husband to Boston in 1848, living first in Charlestown and then in Dorchester. She has a devoted and loving heart and limited means to help the worthy poor.

Flatulency or Wind On Stomach

As It Is Commonly Made, Means That Decaying Food Is Making Gas.

This most serious condition is very prevalent and results most distressingly from indigestion. The stomach in cases of flatulency is unable to digest the food properly. Decaying food in the stomach causes flatulency, forcing their way downward into the bowels, and if not relieved it extends upward, pressing against the lungs, liver and heart, causing shortness of breath, indigestion, foul odors and many times sudden death.

Foods which are filled with gases, when taken into a decaying stomach, cause flatulency rapidly, vegetables being especially given to this quality. Against such a condition the stomach can do but little, because these foul and poisonous gases affect its glands, and cause it to secrete such a degree as to incapacitate it almost at once.

These gases distend the stomach in all directions, preventing the contracting muscles from doing their regular duties, or if they do force the gas from the stomach it goes elsewhere in the system with even more harassing results, and then the decaying mass still remains to generate more gases.

The most effective method for allaying flatulency is to remove the cause of gas making. An emetic will do this, but the stomach will have the same trouble the moment new food enters it.

Stuart's Dyspepsia Tablets get at gas food at once, digest it, prevent decay, quickly reduce food to nourishment, make good rich gastric fluid and pass the digested food to the intestines, giving the stomach its rest and the system its nourishment. Flatulency simply cannot exist when these little tablets are used. They build up the stomach fluids so that it matters not how many vegetables you eat or food containing quantities of gas, the stomach does its work well and quickly.

Stuart's Dyspepsia Tablets are sold everywhere and used the whole world over by sick stomachs and stomachs that want to eat heartily and yet not get sick.

Every druggist carries Stuart's Dyspepsia Tablets, price 50 cents per box. The demand for these little digesters is constantly increasing. Forty thousand physicians in America and Canada use them and prescribe them. Send us your name and address and we will send you a trial package by mail free. Address P. A. Stuart Co., 160 Stuart Bldg., Marshall, Mass.

SOUTH BOSTON TO OUTDOOR HER PAST IN EVACUATION DAY FEAST AND PAGEANT

Chief marshal of the parade and prominent officers and committeemen in South Boston's Evacuation Day celebration.

Chief Marshal of the parade and prominent officers and committeemen in South Boston's Evacuation Day celebration.

Naval Heroes to Join With Mayor and Citizens in Big Anniversary Celebration.

BEGINNING next Tuesday night, and continuing all day Wednesday and day late into Wednesday night South Boston will celebrate the one hundred and thirty-third anniversary of the evacuation of Boston by the British forces.

Just as much as it is to be made of Evacuation Day this year as ever before. More will be made of the big day for the peninsula district, many say.

Certain it is the merchants and the citizens are already turning that part of the city into a gay and festive looking place through the Jewish decorations which are being placed on every house.

The celebration this year is to be held in South Boston tonight, when more than 10,000 officers will be held at the Hotel Hamilton. The banquet is to be held under the auspices of the South Boston Citizens' Association.

Admiral Sperry, who piloted the great vessel, the USS Albatross, from the Boston State around the world and back to Hampton Roads, without a serious accident, has been invited to attend. Among the distinguished men who have promised to take part in the big demonstration are: Major-General George B. Davis, Judge Advocate General, United States Army, and the commanding officers of the largest ship, the USS Albatross, and the USS Albatross, and the USS Albatross.

The great display of Wednesday is the military parade at 2 o'clock in the afternoon. The parade will be a part of the line of the USS Albatross, and the USS Albatross, and the USS Albatross.

The officers from all of the forts and the sailors and marines from the fort will participate with a flourish. The parade will be a part of the line of the USS Albatross, and the USS Albatross, and the USS Albatross.

ton High School and well-known men will address the people. At the same time Mayor George A. Hibbard will deliver a speech at the Hotel Hamilton to the people of South Boston.

In the afternoon, following the parade, a cross-country run of six miles will be held from the South Boston High School to the Hotel Hamilton. At 7:30 a night in the evening a musical concert will be given at the Hotel Hamilton. The concert will be given at the Hotel Hamilton.

All day long Wednesday, and early on Thursday morning, the people will be watching the parade. The parade will be a part of the line of the USS Albatross, and the USS Albatross, and the USS Albatross.

The parade will be a part of the line of the USS Albatross, and the USS Albatross, and the USS Albatross. The parade will be a part of the line of the USS Albatross, and the USS Albatross, and the USS Albatross.

The parade will be a part of the line of the USS Albatross, and the USS Albatross, and the USS Albatross. The parade will be a part of the line of the USS Albatross, and the USS Albatross, and the USS Albatross.

Evacuation, even more profound than when they were already being placed on the streets and houses on the peninsula. The South Boston High School is to be decorated and the famous Evacuation Monument of Dorchester Heights will be illuminated in flags and bunting for the day.

A special service will be held at the proper celebration of the day.

Colors Interwined.

As the song of Erin celebrated March 17 in honor of St. Patrick, many of the decorations will consist of the colors of the Republic interwined with the colors of the "Auld Sod," and the air sprang from the land will be a part of the line of the USS Albatross, and the USS Albatross, and the USS Albatross.

At 7:30 the athletic sports are to take place on the grounds of the South Boston High School. The sports will be a part of the line of the USS Albatross, and the USS Albatross, and the USS Albatross.

A special service will be held at the proper celebration of the day. The parade will be a part of the line of the USS Albatross, and the USS Albatross, and the USS Albatross.

EVACUATION DAY PROGRAM
TUESDAY NIGHT.
Banquet, South Boston Citizens' Association.

WEDNESDAY.
10 a. m.—Mayor George A. Hibbard entertains at Hotel Bellevue.
10 a. m.—Patriotic exercises in South Boston High School.
2 p. m.—Great military parade.
4:15 p. m.—Cross country run.
7:30 p. m.—Athletic games in D street gymnasium.

8 p. m.—Fireworks and band concert at Marine Park.

Naval Brigade of the Massachusetts Volunteer Battalion will be a part of the line of the USS Albatross, and the USS Albatross, and the USS Albatross.

The parade will be a part of the line of the USS Albatross, and the USS Albatross, and the USS Albatross. The parade will be a part of the line of the USS Albatross, and the USS Albatross, and the USS Albatross.

The parade will be a part of the line of the USS Albatross, and the USS Albatross, and the USS Albatross. The parade will be a part of the line of the USS Albatross, and the USS Albatross, and the USS Albatross.

Special School Exercises.

In the morning at 10 o'clock special exercises are to be held in the South Boston High School.

The parade will be a part of the line of the USS Albatross, and the USS Albatross, and the USS Albatross. The parade will be a part of the line of the USS Albatross, and the USS Albatross, and the USS Albatross.

WOMAN HEALS SICK TAFTS TO SUMMER BY MYSTIC POWER

Mrs. Mary E. Chapin of Back Bay Declares She Can Cure Any Form of Disease.

THAT she has made the hotel to see, has caused broken hearts and minds, and that no form of disease is incurable are some of the remarkable claims made by Mrs. Mary E. Chapin, of No. 128 Newbury street, Back Bay.

Today Mrs. Chapin will begin to treat for influenza, a disease which has been heard of the marvelous cures which have been effected merely through the power of perfect faith in Christ's ability to heal disease.

"I believe that every form of disease can be cured by the Christ-magic of healing," said Mrs. Chapin yesterday.

The disease which has caused much suffering and blindness has been cured by the power of perfect faith in Christ's ability to heal disease.

Both have been cured by the power of perfect faith in Christ's ability to heal disease. The disease which has caused much suffering and blindness has been cured by the power of perfect faith in Christ's ability to heal disease.

Both have been cured by the power of perfect faith in Christ's ability to heal disease. The disease which has caused much suffering and blindness has been cured by the power of perfect faith in Christ's ability to heal disease.

Crowds Throng to Lectures.

Mrs. Chapin is a woman of wide reputation. Her lectures in her elegant suite of rooms in the Newbury street house have been attended by scores of the best people in this city. She says that wherever ministers listen to her talk of how to heal the sick, if Christ's methods are applied to.

She is a member of the Colonial League and the Daughters of the American Revolution. She is a member of the New England Women's Club and a prominent member of the Protestant Episcopal Church.

She is also a member of the Episcopal Church and the Episcopal Church. She is also a member of the Episcopal Church and the Episcopal Church.

Operator Who Got First News of Fleet Is Remembered.

Boxing. American. Other Sports

John . Says Johnson Shouldn't Act as Dictator to Jeffries

JOHNSON TRIES TO DICTATE TERMS SAYS

Colored Champion Makes Mistake In Assailing the Present Title Holder.

HIS STAND IS FOOLISH

Jeffries Should Be the One to Name the Conditions for a Match.

By JOHN L. BULLIVAN.

RIGHT out of the box Jack Johnson has made a bad break on his arrival in this country by showing his arrogant way in claiming that if he fights Jeffries he will dictate the terms of battle.

Nothing sounds more foolish. Despite the fact that Johnson declares he is champion of the world by beating Burns, Jeffries is the real champion until he is beaten and will do what dictating there is to be done.

There are two reasons for this. When a fighter wins a title he is the rightful owner of it until beaten, even if it is a hundred years. He has a perfect right to retire, but if he decides to come back into the ring again he is still undefeated. He is still champion and to say as dear to him, and at the present time makes Jeffries champion.

The second reason is that public sentiment will favor Johnson to fight Jeffries under the conditions which Jeffries names.

Must Change Tactics.

Johnson knows or should know that that he can not hope to win that necessary advantage for a fighter, public sentiment, while Jeffries is active and is willing to fight him, but he is in a position to force him to fight on his own terms. Johnson must change tactics.

Johnson knows that he is in a position to force him to fight on his own terms. Johnson must change tactics.

Johnson knows that he is in a position to force him to fight on his own terms. Johnson must change tactics.

JOEY BOWKER, WHO MEETS DELMONT HERE TUESDAY

LOOK OUT, MR. JOHNSON!

If You Go to Texas the Officers May Make Trouble for You.

Galveston, Tex., March 13.—If the champion pugilist, Jack Johnson, brings his white wife to Galveston he will be prosecuted under the Texas laws, which forbid white and black marriage. Reports that Johnson had a negro wife living in Texas and that trouble would come when the champion returned home, have brought out a reply from Johnson that he has never married and that his wife is in Texas.

Johnson says that his wife is in Texas and that he has never married. Johnson says that his wife is in Texas and that he has never married.

MUDGY GROUNDS PREVENT DOVES PLAYING GAME

Boston Nationals Will Have to Hustle to Make Up Lost Ground.

THEY'RE ALL WITH FRANK

New Manager Finds a Willing Lot of Players Who Will Do Their Best in Pennant Race.

By BILL ROSS.

AUGUSTA, Ga., March 12.—Bad weather kept the Doves back today, and on Monday the Boston Nationals will start in to recover lost ground, and only bad weather can hold them back.

The team was at the ball park morning and afternoon today, but all that could be done was to keep the pitchers going. Not a bat was used at either session. The infield was so soft that running would have been a cart-horse proceeding. The mud was several inches deep along the base line, and the grass was soaking wet.

All the springing that was done was down around where a ground crew was working. The only team in the city who were overhauled by the pitcher was the Doves.

DUAL GAMES WON BY ROXBURY LATIN

Bart Connolly Star of Meet in Which Noble School Is Beaten.

Connolly.

The first outdoor track meet of the season was held yesterday on Irvington Oval, where Roxbury Latin and Noble and Greenough schools held a dual meet. The Roxbury boys winning out by the total of 37.3 to 22.7.

The success of the Roxbury Latin was due to its star athlete, Bart Connolly, who won about everything he went into, and he appeared in nearly all the items on the program.

He won the 40-yard dash, 500 and 600-yard runs, hurdles, getting victory in the high jump. His time in the 50-yard run was extremely good, 7.1 seconds. Nobles' fastest time to extend himself to the tape was 7.2 seconds.

Connolly's victory in the 500-yard run was the last of his victories, as he was unable to finish the 600-yard run. He was beaten by a fine sprinter from the Noble school, who won the race in 7.2 seconds.

The 100-yard dash was won by Connolly, leading from the gun and gradually increasing his lead. He won the race in 17.5 seconds.

The 200-yard dash was won by Connolly, leading from the gun and gradually increasing his lead. He won the race in 35.5 seconds.

The 400-yard dash was won by Connolly, leading from the gun and gradually increasing his lead. He won the race in 1:10.5 seconds.

The 800-yard dash was won by Connolly, leading from the gun and gradually increasing his lead. He won the race in 2:25.5 seconds.

The 1600-yard dash was won by Connolly, leading from the gun and gradually increasing his lead. He won the race in 5:10.5 seconds.

The 3200-yard dash was won by Connolly, leading from the gun and gradually increasing his lead. He won the race in 10:45.5 seconds.

The 6400-yard dash was won by Connolly, leading from the gun and gradually increasing his lead. He won the race in 21:30.5 seconds.

The 12800-yard dash was won by Connolly, leading from the gun and gradually increasing his lead. He won the race in 43:15.5 seconds.

The 25600-yard dash was won by Connolly, leading from the gun and gradually increasing his lead. He won the race in 86:30.5 seconds.

The 51200-yard dash was won by Connolly, leading from the gun and gradually increasing his lead. He won the race in 173:15.5 seconds.

The 102400-yard dash was won by Connolly, leading from the gun and gradually increasing his lead. He won the race in 346:30.5 seconds.

The 204800-yard dash was won by Connolly, leading from the gun and gradually increasing his lead. He won the race in 693:15.5 seconds.

The 409600-yard dash was won by Connolly, leading from the gun and gradually increasing his lead. He won the race in 1386:30.5 seconds.

The 819200-yard dash was won by Connolly, leading from the gun and gradually increasing his lead. He won the race in 2773:15.5 seconds.

The 1638400-yard dash was won by Connolly, leading from the gun and gradually increasing his lead. He won the race in 5546:30.5 seconds.

The 3276800-yard dash was won by Connolly, leading from the gun and gradually increasing his lead. He won the race in 11093:15.5 seconds.

The 6553600-yard dash was won by Connolly, leading from the gun and gradually increasing his lead. He won the race in 22186:30.5 seconds.

CORBETT SAYS TENNESSEE MAY SEE BIG MILLS

New Boxing Law in Southern State Passes Way for Mitt Feast.

EX-CHAMP GIVES WARNING

Former Champion Advises Promoters of Possible Mistakes in Running the Game.

By JAMES J. CORBETT.

INTEREST in the fighting game at the present time centres in Tennessee. The eight-round boxing law just passed by the State Legislature means that the sport will flourish there for two years at least.

For the next year probably more fights will take place in Memphis, Chattanooga and Nashville than in all the rest of the United States combined. In fact, the interest in the game has about shifted to the South.

Of course, Los Angeles and San Francisco will be the spots for the great big bouts, as championships are seldom settled in eight rounds.

But for almost certainly Tennessee will surpass even Philadelphia and surpass New York. Of course, the clubs in the latter place are long quiet at the present time, and only a few contests are being held.

There is a great deal of interest in the sport in Tennessee, and it is expected that the new law will result in a great many fights being held in the state.

It is expected that the new law will result in a great many fights being held in the state.

RECENT ENDURANCE RUN DID NOT HELP MOTORING

Too Ambitious Drivers in the Contest From New York to This City.

There is no denying the fact that the recent endurance run from New York to Boston somewhat injured the cause of motoring in the eyes of the officials. The fact as planned was absolutely a law-abiding competition, and according to the majority of those who were on the first of the speed tests of the several states and towns through which the run passed were respected. The intent was to have a run on a schedule which conformed to the speed laws of the several sections, but two or three unfortunate things happened, which have done nothing to advance the cause of the motorists, and which must be considered as deplorable at any time in the past, and especially at a time when motor laws are being considered by the legislatures.

However is all justice to local motorists it is only right and proper to state that the affair was held under auspices of a New Yorker, and that a single entry was made by a man from this city or state. The killing of the man in a congested and later violation of the respect due to the American flag, followed later by the unfortunate accident to parties not competing in the race, have of course had a most wholesome effect upon the officials. The run was not under the auspices of the Boston Automobile League, Association, it did not end with the completion of the organization but was entered up by New Yorkers. It is a pity that the herd has been lost and forgotten. But there were many things about the run which have called forth the criticism from the officials. Therefore, it is not surprising that the Massachusetts Highway Commission came out with the appeal and statement.

The commission feels it to be its duty to take all the means within its power to get better automobile drivers of any kind, no matter what time they may be needed, which involves the use of the highways of

NEW DATE SET FOR BOSTON'S BIG AUTO SHOW

Committee Vote Week of April 26 for New York Motor Event.

At the last meeting of the New York Automobile Club and its committee, it was decided to change the date of its annual show from the first of May to the week of April 26 to 30. This was done because of the fact that the probability of a late spring and the consequent delay in the opening of the season made it impossible to hold the show on the first of May. The committee also decided to hold the show at the New York Motor Club, which is a more convenient location for the public. The show will be held from April 26 to 30, and will feature a large number of new automobiles, including the latest models from the American and foreign manufacturers. The committee also decided to hold a series of lectures and demonstrations during the show, and to have a large number of races and other events. The show is expected to be one of the largest and most successful in the history of the club.

10,000 MILE AUTO RUN IS POSTPONED

Owing to the fact that it is now impossible to find a car which will stand up to the test of 10,000 miles, the run has been postponed. The run was originally planned for the first of May, but it was found that no car was available which could stand up to the test. The run will now be held at a later date, and will feature a new car which is expected to be able to stand up to the test. The run is expected to be one of the largest and most successful in the history of the club.

As Expressed at the Leading Automobile Shows

GOODRICH TIRES

On the Madison Square Show cars in New York there were 176 Goodrich Tires. On the Electric 60 Palmer Web Tires (60% more than nearest competitor).

Jumping across the continent, Los Angeles announced its preference in no uncertain terms by equipping show cars with 156 Goodrich tires, 76% more than nearest competitor.

Other cities fell in line, with Goodrich in the lead by decisive percentages, ranging up to 232% more than the nearest competitor:

CLEVELAND—192 Goodrich Tires, over 50% more than nearest competitor.

DETROIT—112 Goodrich Tires, nearest competitor 76.

ST. LOUIS—197 Goodrich Tires, nearest competitor 112.

KANSAS CITY—228 Goodrich Tires, nearest competitor 92.

OMAHA—124 Goodrich Tires, nearest competitor 44.

LINCOLN—28 Goodrich Tires, nearest competitor 12.

BALTIMORE—136 Goodrich Tires, nearest competitor 132.

Ten cities and ten triumphs for the tire that is ALWAYS good—now better than ever.

Dizziness A Danger Signal

Forewarning of More Serious Conditions of the Alimentary Tract.

Variably faintness and dizziness indicate the beginning of serious troubles, stomach and intestinal, usually follow which sooner or later develop symptoms of an alarming nature. Colic, gastritis, constipation, flatulency, liver troubles and a general breakdown of the health usually follow the first signs when left to run their full course. When the stomach is forming its proper duty the rest of the system is sure to suffer. As it is well known fact that the stomach feeds the rest of the body and organs, therefore many a disease, whether it arises, either directly or indirectly from disorder of the stomach.

Whenever there is the slightest indication of faintness or dizziness it should be cured at once, for it may not develop more dangerous symptoms. Charcoal is an excellent remedy for the stomach, and its action on the system is general.

Charcoal has been used for several thousand years, both as a purgative and an antidote for poisons taken in the stomach. The success of charcoal is unquestionable. The only remaining question is to get charcoal in the most convenient and pleasant form. The F. A. Stuart Co. manufactures a charcoal lozenge composed of young willow wood chips and a powerful, making this valuable product harmless. A sample will be sent upon request, or Stuart's Charcoal Tablets can be had at any drug store. Price 50c per box. The F. A. Stuart Co., 200 State Bldg., Marshall, Mass.

Another Riker-Jaynes Story

Increasing business and lack of space have created a demand for better facilities at the above location, and another story, the second floor of the building, has consequently been added to this busy store.

Here will be located the following new and enlarged Departments: Human Hair Goods and Hair Dressing Parlors, Electrical Supplies, Rubber Goods and Trusses and Elastic Hosiery. Balcony and upper floors will be devoted to a large and comfortable elevator running exclusively between the first and second floors and available from the store floor. These Departments may also be reached from the Washington street entrance to building by an elevator which also accommodates people who wish to reach the upper floors. A modernized idea of the advantages of these departments may be obtained by a perusal of the following interesting matter and attractive prices, but better still—visit the New Riker-Jaynes addition and are for yourself.

To every customer purchasing goods to the amount of \$25.00 or over on the opening day, Monday, March 16th, we will present a free Quarter Pound Box of Oval O-GO, a "Well-Known" "Satisfaction" Chocolate free of charge. You may purchase any class of goods of any of our departments, Toilet Goods, Drugs, Patent Medicines, Hospital and Sick Room Supplies, Hair Goods, Cigars, Soda or Confectionery. This offer good only on date specified and only at 498 Washington St.

HIGGINS TO PRESS MRS. SILSBY'S CASE

Prosecutor to Urge Full Punishment for Woman Who Shot and Killed Child.

And it is that the case against Mrs. Hope A. Nichols will be dropped is false. If she is convicted of manslaughter I shall urge that she be given the fullest extent of the law in regard to punishment. **Attainment of District Attorney John J. Higgins of Middlesex county to a Boston Sunday American reporter yesterday.**

The case against Mrs. Nichols was dropped by Mr. Higgins on July 2, 1908, but at present, according to police and legal circles that the District Attorney's office was not inclined to pursue the case against Mrs. Nichols for the alleged shooting of Clinton E. Childs, which occurred in the rear of the Nichols residence at 25 Brook. Walkway, on the night of September 21, 1908. The case will be called on for trial at a later date.

WEEK OF GAIETY LEAVES SOCIETY FEW MOMENTS TO GIVE TO PENITENCE

From Monday Night, Devoted to Dinners and Theatre Parties, to Saturday's Horse Show, Every Hour Filled.

By ELIZABETH ELLIOTT.

SOCIETY has been having a rather gay time of it, the past week, and I'm afraid there weren't many moments devoted to reflection and penitence. Monday night was given over to dinners and theatre parties, Tuesday night the First Corps of Cadets gave their symphony at the Armory; Wednesday night, Society night at the Auto mobile Show attracted the smart ones. Thursday afternoon the tea of the Copley Society at the German art exhibition at Copley Hall; Friday the fair in aid of the Industrial School for Crippled and Deformed Children attracted the fair ones, and Saturday afternoon the Horse Show at the new Riding Club was the event par excellence.

The fair in aid of the Crippled and Deformed Children was, of course, a success—as Boston women are philanthropic if nothing else, and never neglect an opportunity to help those less fortunate—who were out in force on Friday. These actively interested were Mrs. William Sheafe, who was in charge of the musical; Mr. Robert Bowdler, who was at the head of the novelty table; Mrs. S. R. Anthony, who was at the top table; Mrs. Edwin Webster, who presided over the refreshment table; Mrs. Colby and Mrs. C. R. Cutting, who were in charge of the household table; Miss Adele Thayer's representative had the coffee table; Mrs. Avery the cake table, and Mrs. George Warren, the president, had charge of the baby table.

Mrs. George S. Munford presided over the middle table, and Mrs. Tuttle and Mrs. Boyer took the end of the table. The refreshment table also included a bumpy-dumpy, a fortune wheel, a cane and ring toss, and also a lemonade stand.

PAST WEEK BRILLIANT ONE FOR GAY SOCIETY DEVOTEES

Mrs. F. W. Thayer was in charge of the refreshment table. The tea at the Copley Society was a success. The German art exhibition at Copley Hall was a success. How to Overcome Incipient Lung Troubles.

Open air is the great pin-point for a person who has proven one of the most successful means of curing consumption. The very air of these forests is charged with the chemical elements of the pine, which have a wonderful healing effect on the membranes.

Remarkable results, however, have been obtained in incipient stages of lung trouble by open-air living at home and in the city. A simple home-made remedy described below. This remedy is a good thing to keep in the house for use in case of a cold or cough, much simpler to treat a cough or cold when it first appears than to wait until it has become a serious lung trouble. Here is the recipe:

Granulated Sugar Syrup . . . 12 1/2 oz
Put the 2 1/2 oz. of Pinex (fifty cents) in a pint bottle, fill up with water, and shake well. Take a pint of Granulated Sugar, add a cup of water, stir and let boil for ten minutes. Strain through a cloth and it will never spoil. Take a spoonful every hour, two or three times a day.

Obstinate, deep-seated coughs yield quickly to this simple remedy, usually in 24 hours. It is also splendid for whooping cough, hoarseness and iron deficiency. Use the real Pinex, of strength, as it is the most valuable concentrated compound of Norway White Pine Extract, and rich in all the natural elements of the pine. If your doctor does not have it, you can easily order some for you, if you ask him.

The 2 1/2 pint of this unequalled remedy costs only about 50 cents, and will last a whole family a long time.

Real Estate, Apartments and Plant Ads

Types of Single and Apartment Houses, Showing Extensive Building Activity in Forest Hills and Jamaica Plain

'L' EXTENSION MAKES A NEW DEMAND FOR SUBURBAN SITES

Activity in Realty Now Looked For in Jamaica Plain and Forest Hills.

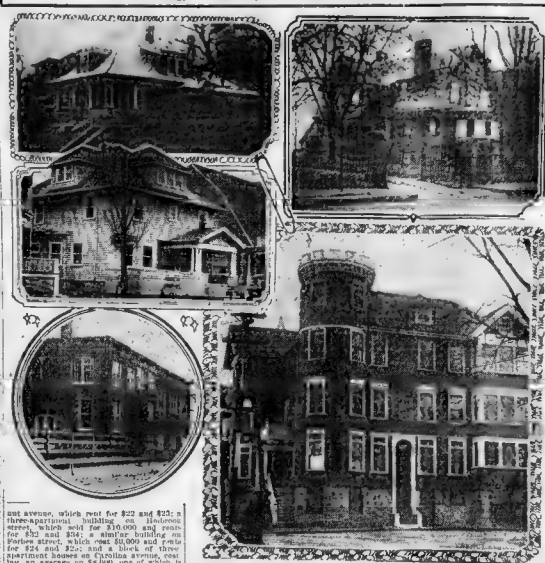

ALL BROKERS KEPT BUSY

BY THE INVESTIGATOR.
THE erection of new houses has been slow compared with that in other residential sections of the city, this is the opinion of the real estate men of Forest Hills and Jamaica Plain. In the latter section, however, the activity in building is now being looked for in a very extensive building activity in the district.

Both these sections form one of the best residential parts of the city, for they contain in addition to the houses of the early builders, particularly in the latter section, a number of modern structures. In some sections, particularly in the latter section, the 17th and 18th streets have been extended and the houses of the early builders are being replaced by modern structures. In the latter section, the houses of the early builders are being replaced by modern structures.

Get Better Buildings.
To some parts of Jamaica Plain land has been secured for the erection of a new house. In other parts it runs much higher. In the latter section, the houses of the early builders are being replaced by modern structures. In the latter section, the houses of the early builders are being replaced by modern structures.

Will Help Thousands.
The new extension of the elevated road to Forest Hills is a very important factor in the development of the city. It will help thousands of people to get to the city more easily. It will help thousands of people to get to the city more easily.

Pictures on left, top to bottom, show: New \$20,000 single house on Unimsted street, \$20,000 single house on Aldworth street, and \$15,000 office building of Jamaica Plain Printing Co., built and owned by James N. Jones, at top, on right, is a \$3,000 single house on Burroughs street, nearly completed; below is a new three-story house, corner of Boylston and Centre streets, which cost \$15,000 to build.

BROKERS ENTHUSIASTIC.
Real Estate of 'L' Will Help Jamaica Plain and Forest Hills.
R. B. Burrows, one of the brokers who deal extensively in real estate in Jamaica Plain and Forest Hills, who has an office at No. 10, Winthrop square, said that the extension of the elevated road to Forest Hills will mean a big increase in real estate activity in all the sections of the city. He said that the extension of the elevated road to Forest Hills will mean a big increase in real estate activity in all the sections of the city.

RENEWED ACTIVITY IN REALTY MARKET

The past week has been an excellent one for the real estate market and a considerable number of houses have been sold. The market is now showing renewed activity and many more houses are expected to be sold in the near future.

West Boston.
The West Boston section has been very active in the real estate market. A number of houses have been sold, and many more are expected to be sold in the near future.

South Boston.
The South Boston section has been very active in the real estate market. A number of houses have been sold, and many more are expected to be sold in the near future.

FAVOR "TAXPAYERS" IN REAL ESTATE EXCHANGE NAME

Movement to Change Description of Organization Meeting With General Approval

P. J. CONCERTED ACTION

Believing that such a name is more appropriate and more fitting for the many important objects for which the exchange is working, the suggestion has been made that the name of the organization be changed to "Taxpayers' Exchange." This suggestion has been met with general approval.

GIVES LOT FOR HOSPITAL

James W. Fendegast Deeds Land for Fight Against White Plague.

James M. Fendegast, vice-president of the Boston Elevated railroad and member of the Boston Association for the Fight Against White Plague, has given a lot of land for the erection of a hospital for the treatment of patients with the disease.

Corner Lot 6000 AS A GOLD BOND

Experts Figure That Land at Street Intersections Is Worth 50 Per Cent. More.

The corner lots at street intersections are worth 50 per cent more than the other lots in the neighborhood. This is the opinion of the experts who have studied the matter.

ARRANGE ENTERTAINMENT

Church of Assumption Parish, Will Honor St. Patrick.

The parishioners of the Church of the Assumption, East Boston, are arranging an entertainment to honor St. Patrick on the evening of March 17th.

WOMAN ROBBED OF \$3,000

Through Window of Train.

A woman was robbed of \$3,000 through the window of a train. The thief is still at large.

This Popular-Priced Farm in Chester, N. H., Is Offered for Sale by the Clair, Moore Co.

JACOB SLEEPER HALL GOES TO ELKS

Turned Over to Boston Lodge by University Officials.

The Jacob Sleeper Hall, which was turned over to the Boston Lodge by the University officials, is now being used as a hall for the lodge.

Must Keep Well Posted.

One of the factors to be considered in connection with the buying of property is to be well posted on the value of the property.

FLOCK OF WHITE CRANES

Nexton County Seen Unusual Flight of Some Rare Fowl.

A flock of white cranes was seen in flight over Nexton County. This is a very rare sight.

SUNDAY CONCERTS.

Pleasing Programs Arranged at the Different Playhouses.

Good bills are announced for concerts at the different playhouses on Sunday.

Bank President Arrested

\$50,000 JOBS ARE
BEGGING FOR MEN

Head of Equitable Tells, Boys

Hard Work and Common

Sense Win Fortunes.

WANAMAKER AN EXAMPLE

'This is an Age of Speculation,'

He Says—Every Man Is

His Own Engineer.'

NEW YORK, March 12.—Paul Wor-

ton says today that any number

of talented men with only a few

dollar positions looking for men who

can competently fill them.

The successful president of the Equi-

table Life Assurance Society and former

Secretary of the Navy, railroad expert

and captain of industry gave the Boston

American today an extended interview

on opportunities for young men, with

particular attention to speculation.

Frequent phrases in his address were:

"This is peculiarly an age of special-

ization."

"Every man is his own engineer."

"The chief ingredients of success are

hard work and common sense."

"A technical education is no help

unless it is supplemented by a

practical education."

CROPS, NOT TARIFF, THE INFLUENCE THAT WILL SWAY PRICES OF STOCKS

By THOMAS C. SHOTWELL.

New York, March 13.—Monday probably the tariff bill will be presented to Congress, and the public will then discover that tariff agitation has been the real cause of the recent decline in the stock market. The public mind has been dwelling on tariff recently, the real people in Wall Street long ago determined that subject from consideration. Some wonderful theories have been advanced by the financial experts as to what it happened to come to the surface just now. It came in a very simple manner. An official of the Erie Railroad told the writer of this column that the company could not meet the terms imposed by the Public Service Commission and would not attempt to do so. He said that the quicker reorganization was put through the better for Erie and everybody else. An expression of opinion to that effect in this column resulted in the stock market the following day. The incident shows on what unstable foundation the market is resting just now. Everybody knows that Erie must be reorganized. Even a receivership should be no shock. If there is any expression of opinion that receivership of Erie must come in the near future, it will not be a shock. It will be a relief. It will be a relief to develop against the market?

Reductions of steel prices need not be taken too seriously. Figures announced by the steel industry show that the steel market is in a position to make some real reductions, and there is a chance of improving business. It can be said on the authority of one of the most important men in the steel trade that the steel market is in a position to make some real reductions, and there is a chance of improving business. It can be said on the authority of one of the most important men in the steel trade that the steel market is in a position to make some real reductions, and there is a chance of improving business.

In the mining district there has been a distinct improvement of silver prices as the result of important discoveries in the Nipissing at Cobalt. Readers of this column will remember that even when Nipissing stock was in the hands of Wall Street, the information was published over and over that the value of the mine was not involved, and that the mine was the greatest silver producer in the world. Recent developments in the Nipissing district have been a steady increase in demand for dividend paying silver stocks on the part of the public. As a result of this demand promoters are planning to put several million shares on the market this summer, and persons buying silver shares must be extremely careful. There are a dozen silver stocks that are as safe as the safest railroad stocks. There are a dozen railroad and industrial shares that are just now as dangerous as the wildest wild-cat that may come out of the mining district of Canada.

Although money is extremely cheap, bankers who take a long look ahead are expecting a gradual tightening and perhaps a severe strain in the late autumn. One of the signs of the coming autumn is the fact that the money market is in a position to make some real reductions, and there is a chance of improving business. It can be said on the authority of one of the most important men in the steel trade that the steel market is in a position to make some real reductions, and there is a chance of improving business.

Reports from the Far West are that farmers are preparing to do just what they have been doing for some time past. They are finding no sympathy. Every farmer who does not plant as much as possible this year will be considered an enemy to his country. The white races of the world number some 1,000,000,000 people. The brown or black number 1,000,000,000. White and colored are increasing at the rate of 12 per cent. a year. Universal peace reigns and the millions that were formerly destroyed in war are now living and increasing. The result is a great increase in the demand for food.

Not only is population and health increasing, but millions in Asia who formerly never knew the taste of wheat are learning to like the cereal. The demand for wheat is growing at the rate of 20,000,000 additional bushels every year. The world's consumption is now 3,500,000,000 bushels yearly. It is estimated that 100,000,000 of the world's population use wheat, which means that they consume four bushels each every year. But Americans and English eat six bushels per capita. The population of America is increasing rapidly. Every year the number of people in America is increasing at the rate of two to six thousand daily. It is easy to look ahead to the day when there will be no wheat raised in America for export. The price recently touched in Chicago is not altogether due to manipulation by speculators.

This situation is no reason for alarm, because there are a billion acres of the richest wheat land in the world on the American continent where a new harvest has never been seen. The high price of wheat will incite farmers to plant more acreage than ever before. It is a wonder that some clever producer who is willing to make money honestly does not put up a wheat producing company. Thousands of persons buy nothing but wheat, and which they never can get their money, except by a miracle. Even should these companies succeed there is no chance of an annual return of more than 5 to 10 per cent. But money invested in wheat lands of the Northwest can return from 10 to 20 per cent, with almost absolute certainty.

Why Do You Try to Escape from Your Better Self?

LOOK back at your FAILURES. Unless you are far beyond the need of this or any other editorial, you have made many of them; unless you are encased in a conceit that no editorial can penetrate, you are willing to admit that you have made them.

Consider these failures carefully. How many of them can be charged to indolence, how many to indifference, how many to your refusal to be influenced by YOUR BETTER SELF?

If you have ever taken the slightest interest in the working of your own mind, you know that you HAVE a Better Self. Moreover, you know that you are often tempted to RUN AWAY FROM IT—tempted often beyond your strength.

Why? Because it is human to want to do wrong. Because "wide is the gate and broad is the way that leadeth to destruction, and many there be that go in thereat."

Because "straight is the gate and narrow is the way that leadeth unto life, and few there be that find it."

In every man and every woman there is a continual conflict between right and wrong, with the chances of battle on the side of wrong.

But never is a wrong committed without protest from the Better Self of the wrongdoer. Never can a man give as an excuse for actual wrongdoing that he DID NOT KNOW better. The Better Self is always there, always sternly pointing out the right thing to do, always ready to warn against the other course. But the more alluring arguments are at the command of the Worse Self. Present enjoyment, future advantage, pleasure, the opportunity to reap unearned harvests, all attract us and tempt us to escape our Better Selves, to ignore their counsel and to do, as we say, "as we please," whatever we know about what we OUGHT TO DO.

Let us take the case of a young man engaged in business—a clerk, say, in a bank. Outside of the office he is surrounded by temptations, which he thinks are peculiar to himself. All men are surrounded by temptations, but this particular young man does not know it. He thinks that never since the world began was such a case as his—never a man with so many rich friends who invite him to share their pleasures—never a man so lucky at cards

and in love—never a man to whom it seemed such a necessity to waste his time, squander his money, and live beyond his means.

He joins a club. His Better Self tells him to keep out of clubs and spend his evenings learning the vast number of things that he doesn't know about his occupation.

At the club he sits into a friendly game of poker now and then. His Better Self tells him that a bank clerk has no business playing poker.

Now and then he goes to the house of a married friend and cheerfully loses "money at bridge. His Better Self again appears on the scene and tells him that bridge is considerably worse than poker, because it is sanctioned by presumably good people—including women—while poker isn't.

Every evening he weakly takes a few drinks on the invitation of young men he thinks he cannot afford to offend. At his ear his Better Self whispers that he not only can afford to offend these people but that he cannot afford to have them for his friends.

Time goes on, and he gambles a little more enthusiastically, drinks a little more regularly, idles his time away a little more steadily. All the time his Better Self is indignant about it.

Sometimes he has long sessions with it, owns the truth of what it tells him, and resolves that thereafter he will pay it the attention that it deserves, and really do something worth while. In his heart he knows that he has capacity and intelligence, and that, if he chose to take the trouble, he could really amount to something.

But this business of doing what he ought to do gets tiresome. It is so much pleasanter to do what he ought not to do—to do what almost everybody else does, forget-

ting that almost everybody else continues forever in the same old, narrow, purposeless rut.

So, when he feels a disquieting prod of conscience and knows that his Better Self is about to say a few words on wasting

youth and acquiring bad habits, he runs away as fast as he can, plunges into dissipation where his Better Self refuses to follow, and forgets all about it till it returns with the headache and coated tongue the next morning and sits uncomfortably on his chest for an hour or two.

The first time this young man discovers the possibility of "borrowing" a little money from the bank without being detected, the Better Self makes a great deal about it.

"Why," it says, "that would be stealing! You know that, don't you? Do you want to be a thief? Supposing you are not discovered—though the chances are ten to one that you will be—how will you feel when you think that you are a thief—just a plain, common, vulgar thief, such as the penitentiaries are filled with? Do you think you can ever look anybody in the face again?"

But the young man has borrowed and lost a great deal of money, and he feels that it must be repaid. He knows where there is a chance to get it all back in a little game. He is sure that it would hurt nobody to borrow the money from the bank. It will all be put back in a few days.

"Why don't you borrow it straight out from the president?" asks the Better Self.

"He wouldn't give it to me," says the young man. "You know that! I wish you'd keep still and let me run my own affairs."

"But I WON'T keep still," replies the Better Self. "I'm going to keep right on talking as long as you'll listen to me. I can't stand here and see you run yourself like that."

"All right!" says the young man. "You go ahead and talk, but I'll run away. You always were an unpleasant companion to have around anyway, with your old-fashioned Benjamin Franklin notions of how to get ahead. Nobody pays any attention to them now. Look at the Captains of Industry. Look at the vice-president of our bank!"

A year later our young man, looking out of the narrow barred window of his cell in the penitentiary, sees an old, broken man being led up the prison road. It is the vice-president of the bank. He, too, had a Better Self that told him not to meddle with other people's money, but the aversion of age makes men as deaf as the folly of youth, and he did not listen. The two will break rock together on the same pile next week—the widely known bank official and the obscure clerk—both wear-

It Is All He Has to Warn Him Against the Consequences of Wickedness, Weakness and Folly.

ing clothes of the same cut, style and STRIPE, the thick brown hair of the boy Jose cropped, the thin white hair of the old man cut in the same fashion.

Now, let us not forget that both these men KNEW ALL THE TIME THAT THEY WERE DOING WRONG.

Each, by training and instinct, could tell the difference between honesty and crime. And in each was a Better Self, which, even up to the hour when they brazenly declared that they "didn't care," was voicing a warning.

But they were not men enough to face it—to listen to it.

Because their Better Selves interfered with their plans they ran away. For ten dead, blank years the young man will regret that he did not ask the approval of his Better Self before he took a course of action that he was doubtful about. The old man will repent of his stubbornness till his friends in the outside world come to carry his body out of the prison gates, and to bury it beside that of the wife whose heart he broke.

It is not comfortable always to be listening to the voice of conscience—to put all our actions to the test before they are done. It is not comfortable—BUT IT IS NECESSARY if we are going to get out of life all there is in it for us.

In this editorial we have taken an extreme case—that of two men who became CRIMINALS. But all the wrongs men can do are not outside the law. Most of them can be committed without any apparent danger—but the danger is there, just the same.

And always your Better Self is ready to point it out. It advises against petty meannesses—against the abuse of authority—against inflicting unnecessary suffering on others—against all the things that are done by greed, or vanity, or folly, or carelessness.

Listen to it and you will go in the right direction. Disregard it and you will find, too late, that you have gone in the wrong direction.

But never say, "I didn't know any better." YOU DID KNOW BETTER. Your Better Self told you better; BUT YOU RAN AWAY FROM IT.

Off With the Fetters of Women by *Eliza Wheeler Wilson*

Mat Wheeler Wilson

"A woman's day
in a harem:
She rises, late,
very late. Her
toilet is slow.
dilatatory; she
always has very
long hair, too
thick and too
heavy to be
arranged. And
she thinks
how pretty she
is in
the silvered
mirror, how
young and
charming; and
it makes her so
sad."

"Every form of slavery which is met with in the world to-day must be abolished: the slave of the harem, the slave of the factory and sweatshop and mill, the slave of convention, the slaves of greed, all must break their chains and go free before the human race can rise to its full stature."

DISCONTENT

By ELLA WHEELER WILCOX.

THE splendid discontent of God
With chaos made the world,
Set suns in place, and filled all space
With stars that shone and whirled

If apes had been content with tails
No thing of higher shape
Had come to birth; the king of earth
To-day would be an ape.

And from the discontent of man
The world's best progress springs.
Then feed the flame (from God it came),
Until you mount on wings.

[illegible]

"And how what goes on till evening. The last hours of a past time, when there were no more. Myself, most have been dull and empty. I have been thinking that the one who do not find in water color. We can all paint beautifully in water color. Ah, the greens we have painted the fairs, the land scenes, or play the same. I have heard Paul Horowitz say some embolden to paint the long golden strips and be absorbed, all alone, in sewing, our white, dainty little, gears, loaded with rings, as over it with her. What we want is something new, something that is not like anything we have expected—a flash, or a thought, a statement, but which never comes. We want to get out walking, in spite of the mud, a spite of the snow, not having street car

Oh, Winnie!

Verse By
CAROLYN WELLS

Down to the Cat Show Winnie went to buy herself
a cat;
She loved the roly-poly ones, all fluffy and fat,
The proud, disdainful beauties and the saucy, gay
coquettes,
Winnie adored them, every one—the furry, purry
pets!

She wandered all around the place, uncertain which
to choose;
The White Angoras were so sweet—so cute the Per
sian Blues.
She paused at last before the one who'd taken the
first prize.
"You beautiful kittims!" Winnie cried, with
sparkling eyes.

"That cat," said Winnie to herself, "I simply must
possess!
And I can soon arrange it if I pay enough, I guess."
She hunted up the owner, and thus gently broke
the ice:
"I want that First Prize Cat," she said, "I'll pay
you any price!"

"Excuse me, ma'am," the owner said (he seemed a
timid man);
"My wife said not to sell her, so I don't see how
I can."
"Don't mind your wife," said Winnie; "sell the cat
—and let her scold!"
"Ah! you don't know her," sighed the man. "No;
this cat can't be sold!"

Did Winnie say, "Oh, never mind, I'll take some
other cat?"
Well, no—Miss Winnie Wynne did not do just ex
actly that!
She looked at him beseechingly (Winnie had won
drous tact!)
And smiled a smile that looked just like the Hippo
drome's last act.

Then eagerly that man held out the blue be-rib
boned cat!
"My wife said I'd be glad," he said, "if you'll ac
cept of that!"
Winnie just snuggled up the angel beast beneath
her chin,
And once again the world wagged well for winsome
Winnie Wynne!

"Hug hard, old bear, hug hard."

"Hug hard, old bear, hug hard."

PLESS not have personal knowledge of the widespread mental and physical suffering and financial loss which follow when the temporary closing of banks is decreed. To illustrate the benefits of a law which would insure the absolute safety of your money wherever deposited, it is suggested that you write your Congressman and elect a man which brought this subject forcibly to his attention and led him to introduce in the House a bill for the purpose of creating a Federal fund to guarantee deposits in State banks.

There is a widow, with three small children, struggling every nerve to make a living from the small business of her husband, and who has been left with three small children and a mortgage of \$2,000. To meet this mortgage she has saved by the most rigid economy \$1,100, and she has been unable to get any of the Brooklyn banks which was forced to close its doors during the dark panic days.

As all back would have it, the husband fell due a day or two after the bank closed and the mortgages, being hard pressed for ready money, demanded payment of the principal. The woman was nearly fainter over the prospect of losing her home, the result of years of effort, of having some stolen from her children and of having to starve all over London than ever to earn a bare

And all these misgivings were upon her but for the intervention of a woman who at the first glance since appearing a philanthropist, or rather a

over the last 100 years, despite the fact that we have had two or three very long periods that are this way, we, as a nation, do not have the corporate structure that we have in other countries. Is there not some reason for this? Is there not some reason that disasters like this, which can only come, divided into four or five categories, have been able to take place? I believe that there is some simple reason, and that is that we

MYSTERIES OF THE ANCIENT ETRUSCANS REVEALED

TOMB OF TARQUIN, THE ETRUSCAN KING OF ROME.

THE greatest puzzle in classical history has long been the identity of the mysterious ancient Etruscans. They lived side by side with the ancient Romans, but were apparently a different race. Were they Greeks, or Hittites, or Latins, or Egyptians, or what?

There are some thousands of crude Etruscan inscriptions, containing mostly Latin proper nouns, but including some dozen words of a language that has never before been understood.

Now an American scholar, Professor George Hampl, of the Department of Pathology, Stanford University, claims to have solved this great puzzle of the schools. According to him, the Etruscans were not, as generally supposed, a non-European race, but an Italian race, closely allied to the Romans, and speaking a language belonging to the same stem as Latin. He asserts that in this way he has discovered the key by which he can read the mysterious Etruscan inscriptions.

Ever since the inscriptions were found scholars have been puzzled by them, because no one could read the writing. And because the writing could not be interpreted no one could explain who those wonderful Etruscan people were and whence they came. If Professor George Hampl has, indeed, solved the puzzle, we should soon be in a position to fill out many gaps in early Roman history.

We have long known that the people we call Etruscans called themselves *Rasenna*, and

were also known in ancient times as the Tyrrheni and Tusci. They were a powerful nation, and lived in that section of Italy bounded on the north by the River Arno and on the south and east by the Apennines and Tiber. It has been supposed that they were Pelasgians, and others held that they were of Hittite origin. In fact, the majority of scholars hold that they came from some part of Asia Minor, judging from the physical characteristics of the people and from the peculiarities of their artistic productions. Many Etruscan tombs have been opened, and, notwithstanding the influence of Greek art easily traced in them, there is much so peculiar about them as to indicate that they were not a European nation.

It is certain from historical records that the Etruscans exercised a very powerful influence upon the shaping of the Roman Government, furnishing even some of the earlier Kings and many of the laws and customs.

The fifth King of Rome, Lucius Tarquinius Priscus, the father of the notorious assassin of the beautiful Lucretia, was an

recting the record of primat-
ology of human evolu-
ed. Prof. David S. Scheninger
s remains in 1933, in the
of the human skull, the
use is here lined with lime-
dash or mark, late which

gave cavemen running far faster on all fours.
The brave doctor went to lower himself down
these cliffs and then crawl far into them, before
he could reach the entrance to the famous cave
of Enluis, a human skull deeply buried in a
cave, in company with many bones of extinct
animals dating from the Pleistocene.
The Enluis skull was by no means apine skull
in color, being rather like that of the Caucasian
man, but it proved that man lived in the Gila
Age.
Then came the epoch-making discovery of the
famous Neanderthal skull, which was found
laid in 1907 by some workmen in a limestone
quarry, near Düsseldorf, in the Valley of the
Rhine. It was a skull of a man, and the skull
case was opened upon the southern side of the
winding river about sixty feet above the stream
bed, and just below the level of the cliff.
The Neanderthal skull in several respects
strongly resembles that of the highest ape. The
skull is very massive, the brow is very high, the
head is low and narrow and shows enormous
brow ridges, like those of the gorilla. The

facial angle is but 62 degrees, not much above
that of the higher apes. The average facial
angle of the human race today is between 80
and 85 degrees.
The apeline peculiarities of this skull appear in
its vertical depression and in the enormous
brow ridges.
But in some respects the skull was not apine.
The brain cavity of the skull is large, the
skull being 140 centimeters long, 120 centime-
ters high, and 100 centimeters wide. The brain
capacity of the bone, being equal to the capacity
of the modern man.
Professor Huxley remarks that "no larger a
mass of brain as this would also support that
the Neanderthal man was a member of the
organization."
Some scientists pointed out that the Neander-
thal man is one that still has representatives in
all nations. The skull of Europe,
the celebrated Scottish King, Neanderthal, was
found in 1868, near Düsseldorf, in the Pleis-
tocene. We know, was a terrible fighter and a
man of extraordinary physical strength.
The Neanderthal man was a very primitive
that of the skull of the Bishop of Toul, of the
fourth century, and the skull of the Neanderthal
man is more primitive than the skull of the
most primitive of the Neanderthal man.
It was not uncommon in the Middle Ages for
the skull of a man to be found in a cave.

By Madame Jane.

TO THE builder of gowns the gown is the thing, but to the fashion writer the accessories of the gown are equally worthy of consideration, the gown remaining the final touch which completes a perfect ensemble. With the exception of fuller skirts to the near future, the question of petticoats is gone. More to the fore, and we shall with joy return to favor of pretty lingerie which gives a much more delicate effect of daintiness than the skirts trousers worn during the winter.

The latest creation is in the shape of a transparent lace undergarment so carefully and smoothly fitted that nothing is added to the still cherished effect of simplicity, and with a very neat lace-trimmed ruffle at the bottom. This skirt is never decorated by starch and the lace is preferably of the cream color which old Valenciennes acquire. I do not mean to say that there is anything new in this style of undergarment, for it has always been prized by dainty women, but it is in its use with the distinctly tailored costume that its newness lies and in its opposition to the soft satin skirt, preferably matching the gown, which we know of old.

There is a question in my mind as to its good taste, for the effect under a dark skirt is certainly daring, but in this day

of risk exposure not only of ankles, but of as much leg as a bathing suit, it is, perhaps, it is not wise to be too daring. Dainty modesty has no place in these days with the Bolome and Grex dancers setting the fashion of too few clothes and the Perfect Woman exhibiting several charms to sedate and attract the women's class. Perhaps the women are acquiring a rather a different expression, what with their drooping hair and upstanding ruffs and ruffled bodices.

There is to the subject of the undergarment a new perfectly fascinating idea. It is being shown in Milan, and who are so beautifully women and so perfectly that they are a joy both to look at and to wear. The skirts are either separate or joined to a girdled bodice in Princess form and are finished with a boy ruffle at the bottom. The skirt of which they are fashioned is so elastic that it clings to the figure without a wrinkle. There is a little sleeveless vest to be worn under the corset and "running" little knickerbockers, fastened below the knee with a bow of ribbon. The whole outfit could almost be drawn through a ring, and nothing could be simpler and daintier.

When one thinks of the enormous out-

put of the corset in skirts one can imagine their wall of paper around the waist and change in fashion, as they have only lately succeeded in perfecting their wasteful models, which the Directorate fashion demanded which will be absolutely useless if the small waist is not its representative. It is difficult to find the perfect waist which is the only thing to lighten one's corset lacing. The waist must be small to contrast with fuller skirts and a wider hip line. I find sure the clinging style will not be given up without a struggle. There have been a more than one change in fashion, kind to stout as well as to the thin. For walking costumes particularly I am not necessary for any radical change, while for indoor toilets a few new styles and a recent fold around the bottom will lend an added grace and ease.

One of the most pronounced changes to be noticed in the Spring models is the increasing use of drapery in the skirts of gowns. There have been many suggestions of drapery introduced on winter

towards the front and pulled towards the back by the long train. Foulards will enjoy even more than their usual popularity and are being shown in a perfect whirl of geometrical designs, some of them of that unfortunate mixture which makes one dizzy to look at. The newest patterns are extremely handsome with a wide border of most artistic Byzantine designs. Many of the new weaves are not suitable for a moderate priced gown which has always been the idea of a foulard, for they are as soft and as pliable as any of the winter satins, quite as expensive. The shawlwater foulards, which I have spoken of before, are, however, quite modern in

of large fanned disks at intervals of three or four inches connected with several strands of alternating small and large beads. Next in favor comes the pearl, sometimes smooth and round, but more often of the uneven fresh water variety, sewn in a pattern on a silver or gold background. A new and increasingly popular design is the peacock feather, which pleases me immensely, for several years ago I was captivated by a design which a clever woman made of velvet with a clay hot metal instrument in the graceful rounding lines of the feather, the whole beautifully inset in shades of blue and green, with the eyes in reddish brown. What was my dismay to find that no one shared my enthusiasm on account of the old superstition that peacock feathers were unlucky. Hence they have lain undisturbed, but now they adorn a most attractively blue gown to the admiration of all beholders.

(A)—Back view of evening gown A. (B)—Walking costume of serge in leaf brown, touched with darker tone around the neck and over the shoulders. The bodice extends in draped folds under the arms, disappearing in the back under panel of material thickly braided. Simple skirt with added fullness around the bottom. (BB)—Back of B showing braided panel and fullness of skirt gathered at waist line. (C)—Elaborate evening cloak of pale yellow cloth, handsomely braided with silk cord, and broad band of ermine extends around the neck in wide shawl collar effect and finishes bottom of coat. (D)—This beautiful gown is made of green net closely studied with green crystal beads. Heavy embroidery in gold extends across the front of bodice, around sleeves and continues down each edge of opening on one side, which shows a softish scarf of shaded pinkish gold ribbon. This ribbon ends in a bow held by a heavy ornament near the bottom of the skirt.

Little Brother Gets a Rough Ride, but Oh! What a Ride Grandpa Gives the Boys!

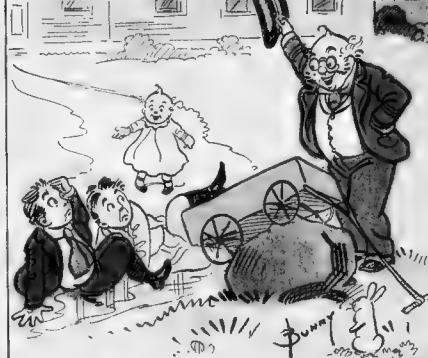

2. GRANDPA—I'll hasten out the back way and soon put a stop to that sort of play!

3. GRANDPA—Why, hello, boys! Been giving little brother a nice little ride, hev'?

5. GRANDPA—Hoopla, boys! How is this for a nice little ride?

G. GRANDPA—Well, well, boys! Already tired? Then let's put little brother in the wagon and go back!
